

Mossaab SAOUTI

PFE Internship – SOC / SOAR / SecOps Automation | From January 2027

Location: Casablanca, Morocco **Phone:** +212 664 187800
Email: saouti.mossaab@etu.uae.ac.ma
LinkedIn: linkedin.com/in/mossaab-saouti-76828b234
GitHub: github.com/Mossaab49 **Portfolio:** mossaab49.github.io/portfolio

Profile

Engineering student in Cybersecurity and Cyber Intelligence at ENSA Tangier. Hands-on experience in SOC triage automation with Shuffle, TheHive 5 case management and Cortex/MISP enrichment. Experience with Wazuh, Rust and REST API and webhook integrations. I am looking for my **end-of-studies (PFE) internship in automation / SecOps** starting **January 2027**.

EDUCATION

ENSA Tangier – National School of Applied Sciences Tangier, Morocco
Engineering degree in **Cybersecurity and Cyber Intelligence** 2024 – present
Expected graduation in 2027, **program taught entirely in English** (ENSA Tangier certificate, Oct. 2026).

PROFESSIONAL EXPERIENCE

Intelcia Tech Jul. – Sep. 2026
PFA Internship – Cybersecurity and SOC automation Casablanca, Morocco

- **Integration and detection:** deployed the lab on 3 Ubuntu Server VMs (Wazuh, Shuffle, TheHive 5, Cortex, MISP) with Docker Compose; developed 3 Wazuh rules on UFW and Apache logs.
- **SOAR workflows:** created 2 Shuffle workflows to extract observables, group alerts and automate the creation and update of TheHive 5 cases, with deduplication and notifications.
- **Enrichment and prioritization:** integrated Cortex and MISP to qualify observables and automatically adjust case severity based on indicators.
- **Validation:** validated 2 attack scenarios in the lab (**50 seconds** between the scan and the case notification); technical report written in English.

DHL Jul. – Aug. 2025
IT Internship – Support and systems administration Casablanca, Morocco

- Provided user support and resolved hardware, software and LAN/Wi-Fi connectivity incidents.
- Installed and configured Windows workstations; contributed to asset tracking in the CMDB and to technical documentation.

TECHNICAL PROJECTS

Web Security and DevSecOps Lab May 2026

- **Controls automation:** set up a GitHub Actions pipeline with Bandit, Safety and Gitleaks to analyze code and dependencies and detect exposed secrets.
- **Analysis and validation:** exploited 4 web vulnerabilities (SQLi, XSS, command injection, path traversal), analyzed the fixes, tested a WAF and documented a simulated incident from JSON logs. Environment: Python/Flask, Docker, OWASP ZAP.

DevOps Task Manager – CI/CD and Deployment Academic project

- Automated dependency installation, tests and Docker image build with GitHub Actions, configured environment variables and the database volume, and tested the API and reviewed the logs.

E-Blog – Web Publishing Platform Laravel, MySQL, Blade, Tailwind CSS

- Developed article, image and search management; implemented authentication, data and file validation, password hashing and CSRF protection.

SKILLS

SOAR and automation: Shuffle, workflow design, REST API, webhooks, deduplication, notifications.
Case management and CTI: TheHive 5, Cortex, MISP, enrichment and qualification of observables and IOCs.
SIEM and detection: Wazuh, detection and correlation rules, UFW and Apache log analysis.
Infrastructure: Docker, Docker Compose, Ubuntu Server, Linux, Windows, VMware, TCP/IP.
Development and tools: Python, JavaScript, Rust, PHP/Laravel, SQL, Git, GitHub.
DevSecOps controls: GitHub Actions, Bandit, Safety, Gitleaks, OWASP ZAP, WAF.

TRAINING AND ADDITIONAL INFORMATION

Cisco Networking Academy – CCNA Path: Introduction to Networks and Switching, Routing, and Wireless Essentials (Feb. 2025); Enterprise Networking, Security, and Automation (June 2025).
Extracurricular: President of the ENSAT Gaming Club since June 2026. Team leadership, event preparation and venue search.
Languages: Arabic (native), French (good comprehension, speaking in progress), English (intermediate; engineering program taught in English).
